## Professional Summary

---

Industrial Engineer with 3+ years of experience in the end-to-end software development lifecycle. Skilled in designing, implementing, supporting, and adapting/maintaining code for solutions specialized in the financial sector, following regulations set by state supervisory entities in Colombia. Proficient in C#, .NET, SQL, Visual Basic, and agile methodologies. Recognized for strong analytical capabilities to interpret client requirements and translate them into precise, functional code. Passionate about data analysis and process optimization to deliver high-impact solutions.

## Work Experience

---

Technology in Information Systems TSI SAS

**Software Design and Development Analyst – Senior**

October 2023 – Present

- Contributed to the design, development, and implementation of the Large Exposures module to comply with regulations from the Colombian Financial Superintendency, achieving successful deployment for over nine clients, including banks and financial entities.
- Drove the continuity and improvement of the XBRL module for regulatory reporting; became a key technical resource, implementing the module for three new clients and delivering adaptations to enhance functionality.
- Implemented and supported software solutions using C#, Visual Basic, .NET, and SQL, helping optimize and improve the generation of regulatory reports for financial sector clients.
- Participated in the full software development lifecycle—from requirements analysis through deployment and support.

Freelance

**Anti Money Laundering Data Management (Freelance)**

April 2020 – September 2023

- Managed and processed large data volumes (DML) for Anti-Money Laundering (AML) projects.
- Developed ETL scripts and processes for catalog isolation and loading, ensuring data integrity and quality for critical report generation.
- Produced detailed reports to support decision-making, optimizing information management and exploitation.

Inteligencia Funcional SAS

**Project Assistant**

January 2017 – April 2019

- Coordinated activities and carried out detailed project tracking, including compliance measurement and progress reporting.
- Led documentation management, implementing a system that ensured organized and efficient information access.
- Documented key processes and supported project execution through data processing and minute preparation.
